

PROJECT DOCUMENTATION

Speedometer mobile app

Project Description:

A speedometer mobile app that measures the speed of a moving vehicle.

Built With:

FLutter Mobile dev.

Features:

- Measure the time the vehicle takes to go from 10km/h to 30km/h.
- Measure the time the vehicle takes to go from 30km/h to 10km/h.

Used Packages:

sensors: ^0.4.2+2

Technical Challenges / Issues:

The Accelerometer sensor in the mobile is changing very fast and you can't set it to an accurate number.
